To the Editors of the New York Express.—
In reply to the renewed attack in yesterday's Express, I would observe that my pastons are not merely the elite of New York society, but are more capable of properly appreciating my entertainment than the Express's editors, who pronounce sentence on exparte evidence, and, when that fails, supply the delitence by drawing upon imagination. I question the value of a morality which consists in slandering one's neighbor and refusing to hear his defence, and I leave it to the newspaper press of this city to speak as to the class of audiences frequenting my soirces, and, also, to rebut the Express's faileshood of there being "but five women in the room" on any evening during the past week. I thank the citizens of his country for their increasing patronage of my entertainment, and roomsel all such as are determined to make political and personal motives the basis for art criticism to ponder well the meaning of the words. Typhus, Measles, Scarletina and Smallpox.—How is it that some persons may sit by the bedside of one attacked with any of the above diseases, and, although surrounded by the contagious miasma, escape the slightest symptoms of the maindy, while others fall victims to its baneful influence? Simply because the bodies of those who catch the infection were already in a diseased state, with regard to their humors, and that the contagious air, like leaven to flour, was only the means of setting them in fermentation. This is a subject of great family importance. In nine cases out of ten, the bodies of all persons are in an unhealthy condition, through their own neglect, and, therefore, are easily acted upon by contagious miasma. how often the boilers are examined and cleaned.
